

Age validation in France

Name of the list: List of individuals who died at age 110 and over from 1987, according to the RNIPP (age validated by INSERM, Health and Demography)

Vital status: dead

Number of observations : 49

Last update: 15 August 2007

Definition of the list according to IDL public variables

- Age: 110+
- Sex: men and women
- Country of birth: no restriction
- Date of birth: 1875 to 1893
- Country of death: France
- Date of death: 1987 to 2003
- Validation level: 2
- Source: INSEE

Source of the data: Institut National de la Statistique et des Etudes Economiques (INSEE) runs the Registre National d'Identification des Personnes Physiques (RNIPP). This file contains informations on name, date of birth, place of birth, date of death, place of death for each person registered at the social security. With special permission from the Commission Nationale de l'Informatique et des Libertés (CNIL), INSEE provides a nominative list of those whose difference between year of death and year of birth is equal or superior to 105.

Age validation process: For each person, a birth record was requested to the municipality of birth and a death record to the municipality of death. When it was impossible to get the birth record (especially for people born outside France) a birth certificate or a baptismal record was searched.
